A pleasant day of art, history and food. In about 15 minutes by car you arrive in Capestrano, a town with important monuments.

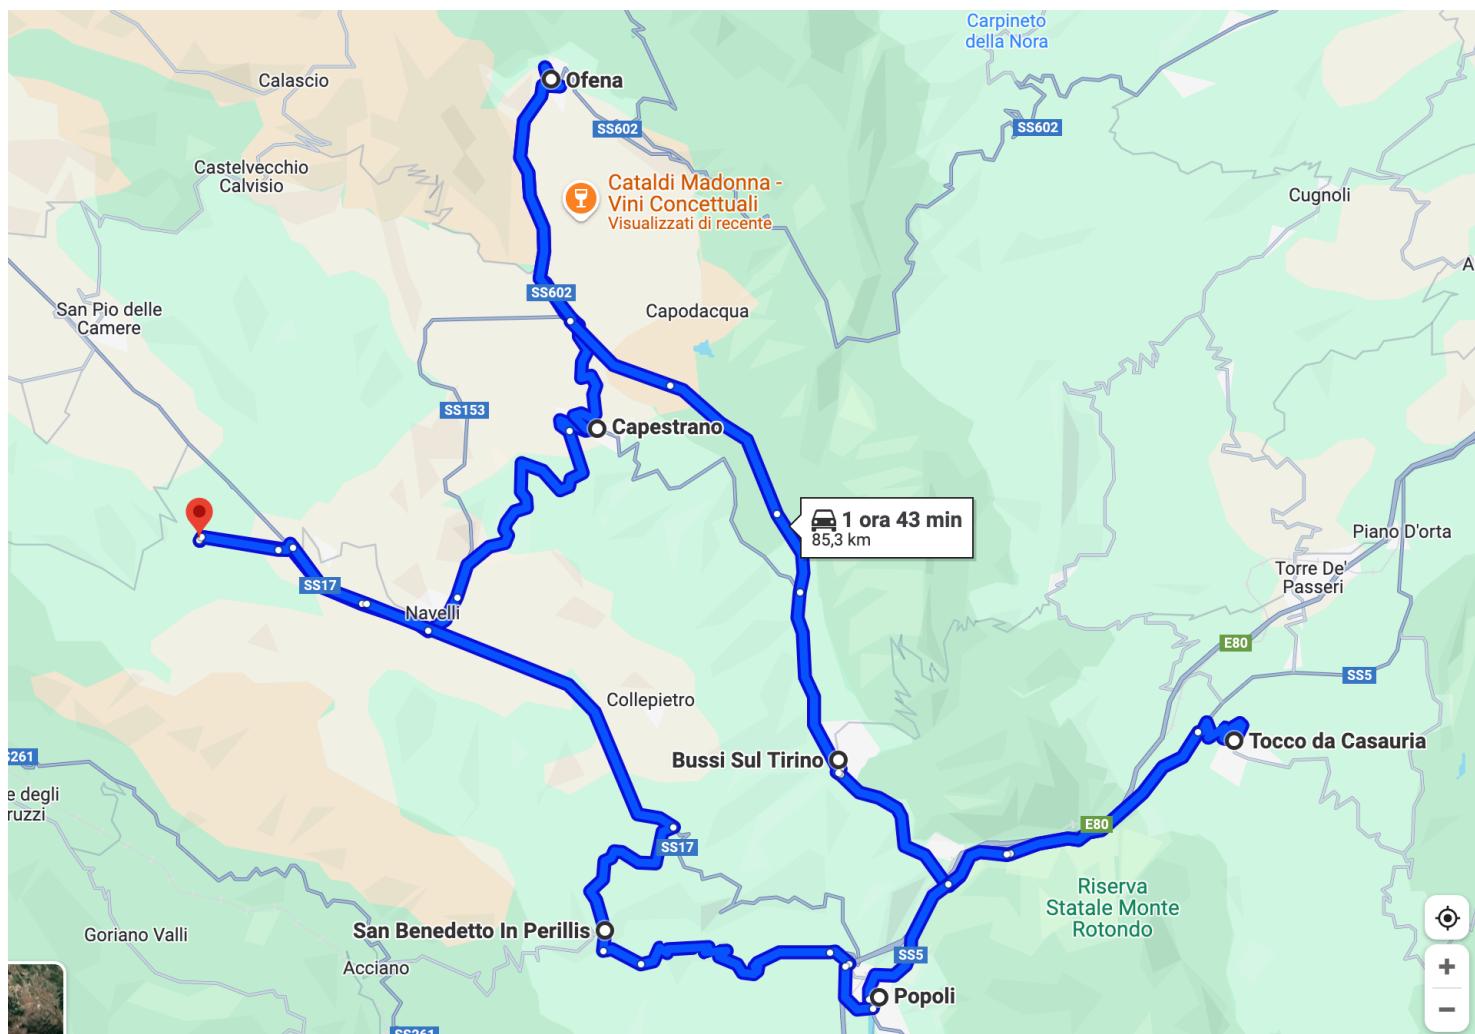

Crossing the valley, near the Tirino river springs and Lake Capodacqua, which deserve a dedicated break, see other brochure, we can go up and visit Ofena. At this point we can choose between two wineries, where we can purchase and

taste excellent wines accompanied by local products: Cataldi Madonna and Inalto.

Depending on the time you have available, you can go down to Bussi, a notable ancient medieval centre, best known today for the visible remains of the chemical settlements of the early 1900s and go back up to the Piana di Navelli, after having passed and visited Popoli,

driving through the famous hairpin bends and visit the village of San Benedetto in Perillis, immersed in very beautiful nature with a breathtaking view of the Tirino valley.

Alternatively, to complete the day dedicated to food, from Bussi you can get to Tocco Casauria, the town of oil, wine and the famous Centerbe liqueur.

In Capestrano, the Piccolomini castle, in the main square, is impressive, but don't miss the convent of San Giovanni, the

beautiful Romanesque abbey of San Pietro ad Oratorium and the beautiful buildings that can be appreciated among the

narrow streets of the village. Very interesting, if open, is the small but evocative Oil Museum.

Crossing the valley, near the sources of the Tirino river and Lake Capodacqua, which deserve a dedicated break, we

can go up and visit Ofena. If desired, from Ofena a mountain road leads to Rocca Calascio,

but on this tour the idea is to stay in the Tirino valley.

Alternatively, to complete the day dedicated to food, from Bussi you can get to Tocco Casauria, the town of oil, wine and the famous Centerbe liqueur.

The Toro Distillery, producer of the most famous Centerbe, is located at the beginning of the Tremonti Gorges which are formed by the offshoots of the Gran Sasso and Monte Morrone. The aromatic and healthy herbs that are used to produce and characterize the

liqueurs and distillates of this factory are collected in the nearby mountains; You will be able to learn first hand about the production phases of each liqueur in the Casauria Distillery, discovering the aromas and smells of the various phases of distillation: from the raw material to the phases in the barrels, to finally arrive at the tasting of the final product. The lucky ones will also be able to witness the bottling of one of the liqueurs when the machines are in action.

Tocco Casauria and the Centerbe

From Bussi you are now very close to it, but in any case Tocco Casauria, the town of oil, wine and the famous Centerbe liqueur, can be reached from Caporciano in just about 40 minutes by car.

The Toro Distillery, producer of the most famous Centerbe, is

located at the beginning of the Tremonti Gorges which are formed by the offshoots of the Gran Sasso and Monte Morrone. The aromatic and healthy herbs that are used to produce and characterize the liqueurs and distillates of this factory are collected in the nearby mountains; You will be able to learn first hand about the production phases of each liqueur in the Casauria Distillery,
